

Best Practices

The Best Practices School Assessment is a review of the teaching and learning environment of your school through classroom observations. Dr. Viola LaFontaine will conduct observations using the ELEOT (Effective Learning Observation Tool) protocol from Cognia (formerly AdvancEd). A summary of the best practices and derailers will be shared with the teachers, and administrators will receive a list of recommended training's based on the findings from the classroom observations. This is not an evaluation process but rather a chance for an independent outside expert to help improve best classroom practices.

Objectives:

- School assessment of best practices
- School assessment of detailers or areas the school should work on for improvements
- Ideas for professional development plans
- Knowledge from an outside perspective of the teaching and learning environment
